

# A brief introduction to R Markdown

## Contents

- **/data:** example data
  - `meta_data.csv`: meta-data describing the contents and structure of `orientations.csv`
- **/docs:** example R Markdown document
- **/lit:** R Markdown cheatsheet
- **/R:** example R code for data processing & analysis
- **/slides:** introductory slides, built using R Markdown

## What you need

- [R](#) > v.3.0
- [RStudio](#)
- the package ‘rmarkdown’
  - `install.packages('rmarkdown')`
- If you want to compile documents to `.pdf`, you’ll need a (free) installation of LaTeX. Follow the link for your operating system [here](#)
